LACPECHVC
Descriptive Measures for FY 16-17 DATA

| | | | |
|--|---|----------------------------------|------------------------|
| | vii. Declined further participation (does not feel a need for services, negative experience, partner objects, client not comfortable with home visits) | | |
| | viii. Other (staff safety issue, declined to state) | | |
| Program characteristics | Consortium Numerator | Consortium Denominator | Type of measure |
| Annual number of families/clients served | Total number of families/clients served in FY | n/a | number |
| Annual funded program capacity (client capacity, not funding amount) | Total number of families/clients that could be served in FY | n/a | number |
| Annual number of referrals given to other services in the County (and broad type) | Number of referrals given in each of the following categories: DV/IPV; health insurance; housing; immigration; prenatal or postpartum care; transportation; well child care | Total N of referrals given in FY | categorical percent |
| Program number of home visits | Total number of home visits conducted in FY | n/a | number |
| Program supervisor to home visitor ratio | Each program will report ratio | n/a | ratio |
| Program average caseload | Each program will report average monthly home visitor caseload | n/a | |

LACPECHVC
Descriptive Measures for FY 16-17 DATA

| | | | |
|--|--|--|---------------------|
| Sources of referrals (into program) | Total numbers of referrals from each source category <i>as defined by the model</i> | Annual number of referrals into the home visiting program | categorical percent |
| Annual # that enroll in services | Total number of families/clients that agree to participate and receive at least one home visit | Annual number of referrals into the home visiting program/number of clients approached | Percent |

* For some programs, the client is the primary caregiver. For EHS, the client is the index child/family. When denominators indicate need for "number of primary caregivers" enrolled, EHS may count number of index children/enrolled families as a proxy. Both indicate number of clients.
